Professional Summary

Final-year BSc Computer Science student specializing in Networking, Cybersecurity, Linux Administration and Secure Software Engineering. Practical experience with SOC concepts, incident investigation, network monitoring, IDS/IPS technologies, SIEM fundamentals and enterprise networking. Built security-focused projects including a SOC Agent Pipeline, a Retrieval-Augmented Generation (RAG) microservice and enterprise cloud applications.

Education

Eduvos — BSc Computer Science (Expected Dec 2026)

Relevant modules include Computer Networks & Security, Advanced Networking, Linux, Cloud Technologies, Database Systems, Data Structures & Algorithms.

Awards

- Eduvos Computer Science Top Achiever Award
- Academic Excellence Award

Certifications

- Fortinet Certified Fundamentals in Cybersecurity (FCF – formerly NSE 2)
- Cisco Network Support and Security
- Cisco Introduction to Cybersecurity
- Cybrary Security Ticketing
- Deloitte Australia Cyber Job Simulation
- Deloitte Australia Technology Job Simulation

Technical Skills

Networking & Security: Wireshark, Zeek, Suricata, Splunk, Bettercap, Cisco Packet Tracer, TCP/IP, VLANs, VLSM, NACLs, SIEM Fundamentals, IDS/IPS, Threat Detection, Incident Response Fundamentals, Log Analysis.

Programming: Python, Java, PHP, JavaScript, HTML, MySQL, C#, Bash.

Frameworks: FastAPI, Flask, Spring Boot, Laravel.

Cloud & DevOps: Docker, Railway, Netlify, Supabase, Vercel, Git, REST APIs.

Experience

IT Systems Administrator Intern – Mmakgano Laboratories

Maintained Windows systems, deployed security patches, provided remote support, troubleshoot infrastructure and networking issues, and assisted with endpoint administration.

Projects

SOC Agent Pipeline: Python pipeline using Zeek and Suricata to normalize logs, detect suspicious activity and generate AI-assisted incident reports.

RAG Microservice: FastAPI, ChromaDB and Groq powered Retrieval-Augmented Generation service with independent microservice architecture, semantic retrieval and grounded AI responses.

Bater Marketplace: PHP MVC e-commerce platform with Docker, Railway, Netlify, role-based authentication and secure API integration.

Additional: Cloud-Based Pathology Testing System, Mmakgano Labs Information System, Dev Drop, PowerShell File Organizer, Enterprise Packet Tracer networking labs (SSH, VLANs, CDP, ACLs).

Core Knowledge

SOC Operations • Threat Detection • Incident Response • Network Monitoring • Enterprise Networking • Linux • Secure Software Development • API Security • Cloud Fundamentals
