Professional Summary

Final-year BSc Computer Science student with a strong foundation in IT support, networking, Windows administration, Linux systems and cybersecurity. Experienced troubleshooting desktop, software and network issues through internship experience, academic projects and enterprise networking labs. Passionate about building a career in IT support while expanding into systems administration, networking and cybersecurity.

Education

Eduvos – BSc Computer Science (Expected Dec 2026)

Relevant modules: Computer Networks & Security, Advanced Networking, Linux, Cloud Technologies, Database Systems, Computer Architecture, Data Structures & Algorithms.

Honours & Awards

- Eduvos Computer Science Top Achiever Award
- Academic Excellence Award

Certifications

- Fortinet Certified Fundamentals in Cybersecurity (FCF – Network Security)
- Cisco Network Support and Security
- Cisco Introduction to Cybersecurity
- Cybrary Security Ticketing
- Deloitte Australia Technology Job Simulation
- Deloitte Australia Cyber Job Simulation

Technical Skills

IT Support: Windows, Ubuntu, Desktop Support, Software Installation, AnyDesk, OS Maintenance.

Networking: TCP/IP, VLANs, VLSM, Routers, Switches, SSH, CDP, ACLs, Cisco Packet Tracer, Network Troubleshooting.

Cybersecurity: Wireshark, Zeek, Suricata, Splunk, Bettercap, SIEM Fundamentals, Log Analysis.

Development: Python, Java, PHP, JavaScript, MySQL, FastAPI, Flask, Laravel, Spring Boot, Docker, Git.

Experience

IT Systems Administrator Intern – Mmakgano Laboratories

Maintained Windows workstations, applied security patches, provided remote support, resolved software and networking issues, configured workstations and supported day-to-day IT operations.

Projects

Enterprise Networking Labs: Router/switch configuration, VLANs, SSH, CDP, ACLs, network troubleshooting.

Bater Marketplace: PHP MVC marketplace with Docker, Railway, Netlify and role-based authentication.

SOC Agent Pipeline: Python, Zeek and Suricata log analysis with AI-assisted incident reporting.

RAG Microservice: FastAPI, ChromaDB and Groq-powered Retrieval-Augmented Generation service.

Additional: Cloud Pathology Testing System, Mmakgano Information System, Dev Drop, PowerShell File Organizer.

Core Competencies

IT Support • Desktop Support • Windows Administration • Linux Administration • Network Troubleshooting • Hardware Troubleshooting • Customer Service • Technical Documentation
