Professional Summary

Final-year BSc Computer Science student with a strong foundation in software engineering, backend development, cloud deployment and AI integration. Experienced building full-stack web applications, REST APIs, microservices and enterprise systems using Python, Java, PHP and JavaScript. Passionate about designing scalable, secure and maintainable software solutions.

Education

Eduvos — BSc Computer Science (Expected Dec 2026)

Technical Skills

Languages: Python, Java, PHP, JavaScript, C#, C++, SQL, HTML/CSS, Bash.

Frameworks: FastAPI, Flask, Spring Boot, Laravel.

Databases: MySQL, PostgreSQL, ChromaDB, Supabase.

Cloud & DevOps: Docker, Railway, Netlify, Git, GitHub, REST APIs, MVC.

Experience

IT Systems Administrator Intern – Mmakgano Laboratories

Supported enterprise IT infrastructure, workstation maintenance, troubleshooting and endpoint administration.

Projects

Bater Marketplace: Full-stack PHP MVC marketplace featuring role-based authentication, REST APIs, Docker deployment, Railway backend and Netlify frontend.

RAG Microservice: FastAPI microservice implementing Retrieval-Augmented Generation using ChromaDB and Groq with decoupled architecture and semantic retrieval.

Cloud-Based Pathology Testing System: Secure cloud-hosted healthcare platform under development.

Mmakgano Information System: Role-based information management platform using PostgreSQL.

Dev Drop: Peer-to-peer file and text sharing platform.

SOC Agent Pipeline: Python-based security log processing pipeline demonstrating backend architecture and automation.

Certifications

Fortinet FCF (NSE2) • Cisco Network Support and Security • Cisco Introduction to Cybersecurity • Deloitte Technology Job Simulation • Deloitte Cyber Job Simulation • Cybrary Security Ticketing

Core Competencies

Backend Development • REST API Design • Microservices • Database Design • Cloud Deployment • Docker • Secure Software Development • System Design • AI Integration • Object-Oriented Programming
